

The 13.6m Liberty unit provides a flexible mobile healthcare environment, built to meet strict NHS standards. Created by linking together twin vehicles, the unit offers: two private consultation rooms, additional treatment areas, a spacious reception and disabled access and toilet facilities. Medical staff using the vehicle have access to a private locker and kitchen area. Easily adaptable and quick to set up, the unit is suitable for a wide range of uses - from a GP or dentist surgery to private health screening, testing and immunisation. Both units are fully air-conditioned.
