

Environmental Policy Statement

Event Marketing Solutions Limited (EMS) recognises the potential health and environmental impacts of its operations and services i.e. the management and operation of mobile display vehicles. EMS recognises the need to manage and reduce these impacts where practicably possible. We will respond positively to these concerns and it is our company policy to ensure that any adverse effects on the environment are kept to a minimum.

EMS is committed to design, develop and deliver quality services and products whilst minimising the potential harmful effects of such actions, including the prevention of pollution, whenever and wherever this is practicable. This will be achieved through the development, implementation and maintenance of the documented environmental management system, which will enable EMS to deliver continual environmental improvement and maintain business excellence.

We are committed to achieving environmental best practice throughout our business activities by:

- Regularly monitoring and striving to reduce energy consumption, where reasonably possible.
- Continually examining our operations and processes to ensure best use of resources, minimise waste and maximise the use of suitable recycled materials.
- Monitoring and reviewing the effectiveness of the transport policy on a continual basis so that the environmental impact is kept to a minimum.
- Compiling with all relevant legislation and striving to exceed requirements where this is practicably possible and appropriate.
- Reviewing regularly all environmental aspects of the organisation and continually working towards objectives and targets to ensure continual improvement at the management review meetings.
- Seeking to integrate environmental considerations in future business policy decisions and also to encourage our suppliers in this policy.
- Communicating this policy as appropriate to staff, customers and suppliers. The policy statement is available on EMS' internal intranet and EMS' website.
- Developing a system to implement and review this policy.

EMS will continually monitor the environmental management system and take corrective action as required to ensure the aims and objectives are met to deliver continual environmental improvements.
